

# Rounded Road Bar

Round and smooth steel bar that is manufactured in different diameters for multiple uses in construction and industry.

## USES

- For hydraulic concrete pavement slab bushings
- For the manufacture of Baskets-Bushings.

## USES

- ARPAVIM
- ARPISO

## CHARACTERISTICS

- Smooth round steel bars and polished finish, hot rolled Grade 42
- Diameters of 1", 1 1/4" and 1 1/2"

## ADVANTAGES

- Uniformity in steel properties
- Compliance with Mexican standards and SCT specifications
- Bars manufactured with a precise cut of their ends that does not leave burr and allows longitudinal movement of the bar

## PROFILE SPECIFICATIONS

|                        |                          |
|------------------------|--------------------------|
| Yield strength Tensile | 4,200 kg/cm <sup>2</sup> |
| Strength               | 6,300 kg/cm <sup>2</sup> |

| Nominal diameter |      | Weight | Area            |
|------------------|------|--------|-----------------|
| inches           | mm   | kg/m   | cm <sup>2</sup> |
| 1                | 25.4 | 3.98   | 5.07            |
| 1 1/4            | 31.7 | 6.21   | 7.92            |
| 1 1/2            | 38.1 | 8.95   | 11.40           |

Standard length of 12.10 m.
