

# Welded Wire Mesh

Grid mesh made of wires used for floor reinforcement, offering savings in material and labor.

## USES

- Reinforcement of floors
- Reinforcement in walls and slabs
- Lightweight concrete structures
- For sidewalks

## CHARACTERISTICS

- Cold rolled wire
- Smooth finish
- Functional design

## ADVANTAGES

- Savings in material and labor
- Easy installation
- Waste reduction

Code	Design	Gauge	Height	Length
25798	66 - 1010	10	m 1.22	m 20

## MANUFACTURING STANDARDS

NMX-B-290 CANACERO

## MESH SPECIFICATIONS

Opening and advancement	6 plg
Tensile strength	5700 kg/cm <sup>2</sup> min.
Creep resistance	5000 kg/cm <sup>2</sup> min.
Elongation at break	6% en 10 Ø
