

Graduated Cattle Mesh

Mesh woven with galvanized steel wires placed in gradual positions both horizontally and are joined with hinge joint knots.

CATTLE GRADUATED MESH

USES

- Ranch pens for cattle (cows, bulls, and calves)

CHARACTERISTICS

- Corrosion resistant
- Tension curve that absorbs overloads
- Allows the posts to be separated up to 6 m

ADVANTAGES

- Shock absorption
- Tension curves for better performance in changing climates
- To prevent entry or exit of people or animals
- Adaptable to different areas

MESH SPECIFICATIONS

Upper/lower selvage wire size	10
Inner wire gauge (linear and cross wire)	12.5
Wire tensile strength	60 ksi
