

Fence Stay

Galvanized steel wires, bent in a "U" shape and helically stranded. Perfect complement for barbed wire fences.

USES

- Support of barbed wire fences while maintaining wire spacing
- Mainly used to further separate the distance between posts in barbed wire installations to improve the rigidity of the fence.

CHARACTERISTICS

- Gauge 9 commercial galvanized steel wire
- Designs for different fence heights
- Helps to evenly distribute the force of a load on the fence.

ADVANTAGES

- 50% savings on fence posts
- Reduces the passage of people or animals
- Increased elasticity and structure to the fence

SEPARATOR SPECIFICATIONS

Gauge	9
Longitudinal tensile strength	55-75 ksi

SEPARATOR

Code	Length	Gauge	Coating	Height
	m		Galvanized	m
1002	1.07	9	Commercial Grade	1.40
1003	1.22	9	Commercial Grade	1.60

* Unit of sale bundles of 100 pieces.
